BASIC RULES USING STRATOBLASTER FOREX TRADING FORMULA

Before trading look to see where price has been and where it is in RELATIONSHIP to green or red CAM lines and SDX CHANNELS. YOU WILL USE NO MORE THAN 20 pip STOP INCLUDING SPREAD IF YOU ENTERED at TOP OR BOTTOM OF SDX LINE. IE 17 pips +3 so price stop 17 pips from entry. You may need larger stop if ENTRY is away from top or bottom SDX.

See where price is within SDX lines and see if it has <u>FORMED A V-TOP OR V-BOTTOM</u> or bounced off top or bottom.

If the market opens BETWEEN the H3 and L3 levels, you must wait for price to approach either of these two levels. **Whichever level it hits first gives you your first trade**. **IN this formula it will be the top or bottom of SDX CHANNELS!**

If price FORMS V-TOP or bounces of top SDX LINE and in _GREEN ZONE_---GO SHORT.

If price FORMS V-BOTTOM or bounces up off bottom SDX line and in _RED ZONE_ –GO LONG.

IF SDX LINES ARE TIGHT TOGETHER and PRICE STUCK between them wait for strong volume / Juice and break of SDX for DIRECTION. If in **_GREEN ZONE_** –SHORT WITH VOLUME, and **_RED ZONE_**—LONG WITH VOLUME.

IF SDX LINES are very wide (50 or so Pips) from top to bottom, go long if price FORMS V-BOTTOM or bounces off bottom SDX line in RED ZONE and Short if price FORMS V-TOP or bounces off TOP SDX LINE if in GREEN Zone.

<u>**BREAK OUT LEVELS**</u> ---**WHEN JUICE INCREASES** and if **<u>price goes ABOVE H4 go LONG</u>** and **<u>BELOW L4 go SHORT</u>**. **<u>IF PRICE MOVES 20 pips in your direction, MOVE STOP TO BREAK EVEN.</u>**

Always look for bounce at SDX LINES TO EXIT!

<u>**EXIT ON 5 MIN CHART IF**</u> TRIGGER LINES CHANGE COLOR AND CROSS 12 EMA, if LONG look for TRIGGER turn RED and cross 12 EMA and if SHORT look for TRIGGER to turn BLUE and CROSS 12 EMA.
