

Please read this document first

This product named stealth forex system, which includes all written material contained within this document, the custom indicators named STEALTH LCD V10 and STEALTH BUY SELL V10 and EARLYBIRD ALERT V10 together with all of the various set-up combinations, (but excluding the metatrader4 trading platform) hereinafter called “the system” is and are copyright and or trade mark protected.

You the purchaser of the system are granted sole personal use of the system. You may not copy, hire or sell or in any other way promulgate nor convey any part or parts of the system without prior written and documented consent of the owners of the trading system.

VERY IMPORTANT

BEFORE YOU BEGIN THE SET UP, MAKE SURE THAT YOU HAVE SAVED ALL THE COMPONENTS OF YOUR DOWNLOAD TO “[DESKTOP](#)”.

YOU MAY ALSO NEED [WinZip](#) TO UNZIP YOUR INDICATOR FILES UNLESS YOU ARE USING WINDOWS XP, VISTA OR HIGHER WHICH HAVE AN UNZIP FACILITY BUILT IN.

If you do need [WinZip](#), please download the free evaluation version before you try to install or use the custom indicators.

[Get Free Evaluation Copy of WinZip Here](#)

First you must download and install MetaTrader 4

[CLICK HERE TO DOWNLOAD YOUR FREE METATRADER 4](#)

You will be unable to proceed until this step is completed

After downloading MetaTrader 4 please take a few moments to register with us as an official Stealth Forex Trading System user and **to be made aware of the important FREE updates** as they occur.

We regret that if you do not register, we will not be able to offer you our email support service and FREE update service.

The Forex market is constantly changing and you need to **ensure that you are always using the most current edition of The Stealth Forex Trading System.**

[CLICK HERE TO REGISTER](#)

OK, NOW YOU ARE READY TO GET STARTED

Read through the set up instructions a couple of times before you start the set up.

Sometimes everything becomes much clearer when you read it twice. You may also find it helpful to print these instructions.

If you need assistance at any time, email us at **support@stealthforex.com**. We are available each trading day Monday – Friday from the start of the London open until the close of the New York session.

07.00 GMT - 19.00 GMT MON - FRI ONLY

We always respond to support emails as a priority but please be aware that support requests received on a Friday may not be responded to until Monday

The set - up Instructions are the same for all trading versions of the Stealth Forex Trading System, with a minor variation for the “Creamer” which will be explained in the pdf “Trading Method”.

STEP ONE

INSTALLING THE CUSTOM INDICATORS, WHICH ARE IN THE ZIPPED FILES THAT YOU SAVED TO “DESKTOP”.

Unzip the attachment named **Stealth BUY SELL** as follows:

Double click on the Zip folder on your “desktop” for **Stealth BUY SELL** and a new WinZip window will open.

Now click: **EXTRACT**

In the second window that appears single click on the **+** sign to open the following folders in turn: –

(My) Computer

System (C:)

Program Files

Metatrader4 (or your brokers MT4 platform name)

Experts

and finally

Indicators

Now click on **Extract** in the smaller extract window.

Repeat this process for each of the custom indicators and the earlybird alert.

After installing the indicators and alert it is necessary to close and re-open your MetaTrader 4 platform.

STEP TWO

SETTING A TEMPLATE TO USE ON YOUR MT4 TRADING CHARTS

Open a new chart

On the chart tool bar, click

Insert

Then from the dropdown menu, select:-

Indicators

Custom

From the list, select

Stealth BUY SELL V10

Repeat this process to load

Stealth LCD V10

And again to load

Stealth Hybrid V10

At this stage do not load **The Earlybird V10** (but remember that this is the procedure to use when you do need to load it - see separate pdf Earybird)

Now add **VOLUME** by holding down the **Ctrl** key on your PC keyboard and type the letter **L**

Now add **FRACTALS** (we will refer to these as stealths)

On the chart tool bar, click

Insert

Then from the dropdown menu, select:-

Indicators

Bill Williams

From the list, select

Fractals

In the new window select a color of your choice and set **size** (shown in a field window as a black bar) to the fourth down.

Now on the chart tool bar select to have the price represented as **Candle Sticks** by clicking the **Candle Axis** button

Save this chart set-up as a **template** by selecting **Charts** from the chart tool bar and from the dropdown menu select:-

Template

Save Template

In the new window name the new file as **STEALTH** and click **Save**

You can now apply your chart settings to each new chart by simply selecting the following:

New Chart

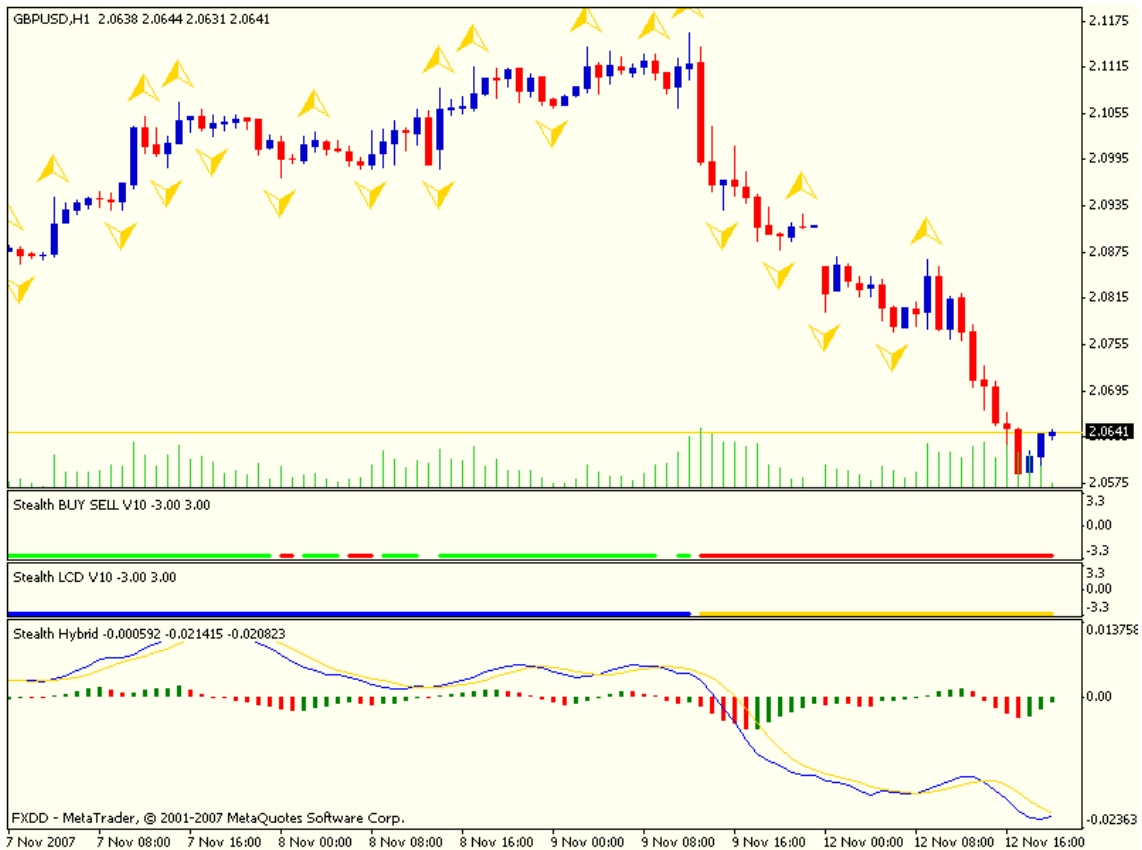

Charts

Template

Load Template

STEALTH

Check your chart set up against the “Stealth Screenshot ” to make sure you have all of the indicators present.

On all time frames the indicator color code is the same:

Stealth LCD long (BUY) = Yellow
Stealth LCD short (SELL) = Blue

Stealth BUY/SELL long (BUY) = Green
Stealth BUY/SELL short (SELL) = Red

Stealth Hybrid long (BUY) = Green
Stealth Hybrid short (SELL) = Red

Common MT4 Functions

For a full guide to the MT4 platform functions simply click on [Help](#) above the chart tool bar.

The following are some commonly used features.

[Changing the chart color](#)

Press F8 on your keyboard and a new window will open. Click on the tab marked **Colors** and then select all of your color options. When you have made your selections click **OK**.

[Switching on and off the Auto scroll](#)

The charts generally auto scroll so that you can always see the current price, however, if you wish to look back in time you need to disable the auto scroll feature, then using the left and right arrows on your keyboard you can take the charts backwards and forwards.

Press F8 on your keyboard and a new window will open. Click on the tab marked **Common** and then de-select **Chart auto scroll** by clicking in the box and then click **OK**.

Remember to re-select **Chart auto scroll** by clicking in the box and then click **OK**, after you have finished your studies so that price will always be in view

[Magnifying the charts](#)

This simply allows you to see the candle formations in greater detail. Each click on the **+ magnifying glass** button on the tool bar will show greater detail. Each click on the **- magnifying glass** button on the tool bar will show more history but less detail.

Occasionally, particularly after magnifying your chart and then switching to another chart, price will not be in the correct position. Simply click on the **shift axis** button a couple of times

Grid feature

If you like to display a grid on your charts or if you have a grid and wish to remove it, on your PC keyboard press **Ctrl** and **G**

One final thing

The time on the MT4 platform is set according to the broker and data feed requirements and cannot be altered.

If you need support with a trading chart related matter, please always use **GMT** – **not local time or chart time** – and put **GMT** after the time so that we know that we are all referring to the same time. It makes answering trading related questions much easier for us.

For example:

.....and then at 13.00 GMT the Stealth LCD changed to blue.....
