

TEB3 SIMPLE

1. Remove everything from your chartsI mean everything!!
 2. Add two sma 4 closed (Blue) sma 5 open (red)
(if you don't have open & closed then 3 & 7 SMA works also)
 3. move to the weekly chart get trend (blue & red lines)
 4. move to the daily charts to get triggers (pink arrows)
 5. move to the 4 hour to get comformation (black arrows)
- 3rd charts

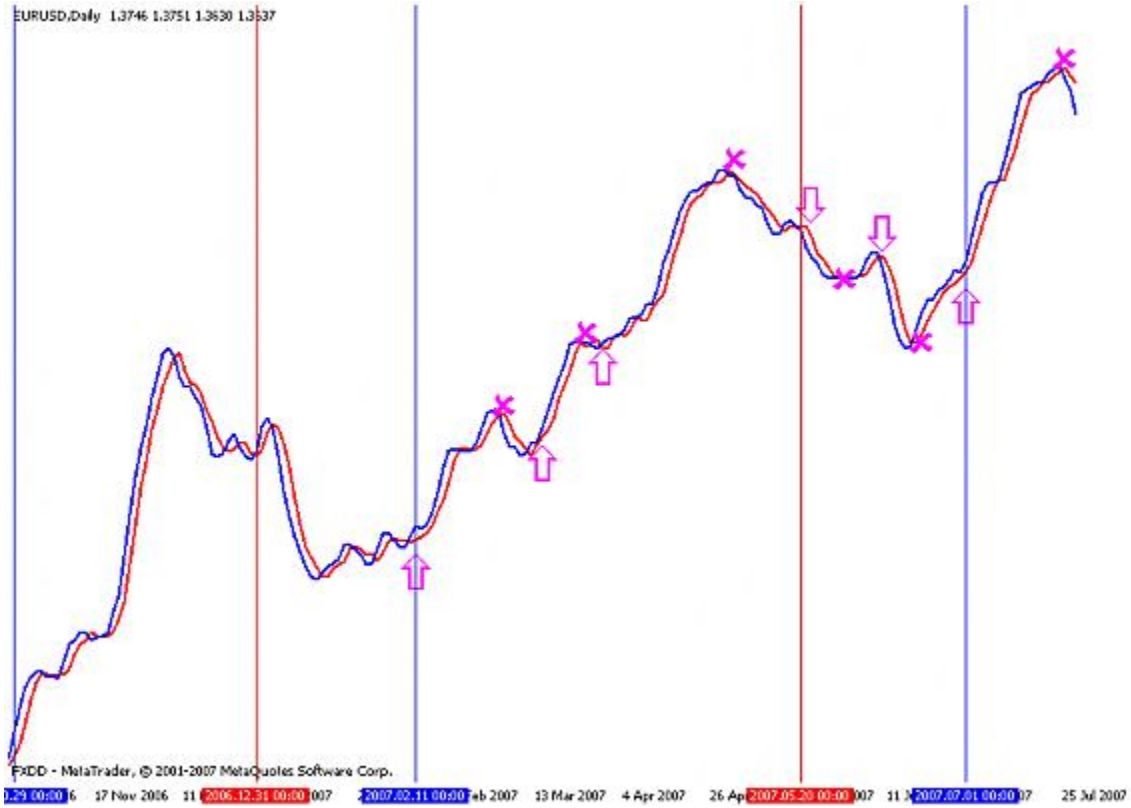

week charts- you see trend blue & red lines only go with them
day charts - are triggers (pink arrows) & stops (Pink "X")
4 hour - conformations of buy/sell (black arrows)
you want all 3 going the same ways

you are in and out on the day charts.
when the weekly turns you are out big time
you can take 1/2 when the 4 hour turns
or add to your trade when the 4 hour goes the way you want
SL atleast 50pips
TP let it ride.
you will have small loses - & big wins

its that simple.

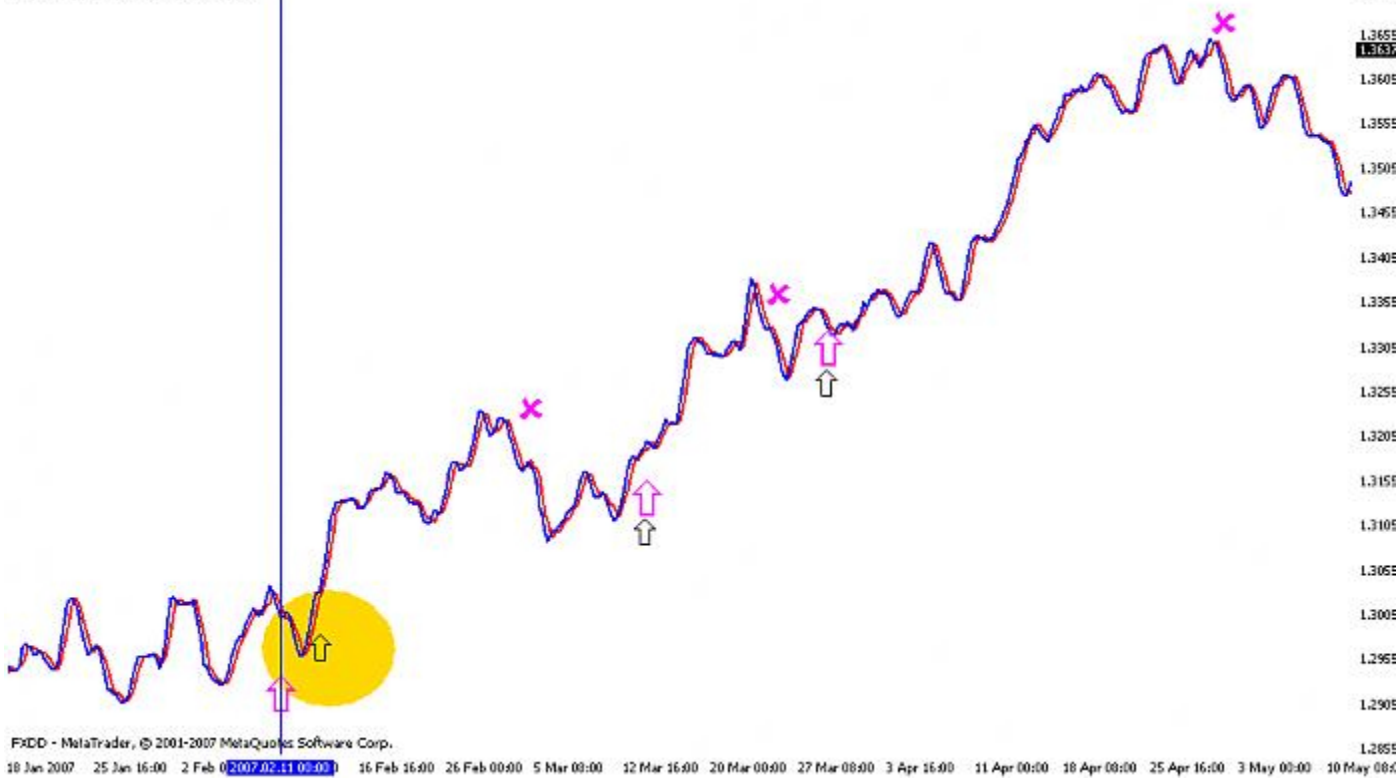

weekly

daily

EURUSD,H4 1.3635 1.3653 1.3635 1.3637

4 hour
