

## TEB simple system

---

charts- 2

- a. 4 hour
- b. 30 mins

tools -3

- a. Stoch slow @ 5.3.3
- b. 50 ema
- c. candles ..esp. watch tails (shaddow)

rules

1. Get the trend from the 4 hour chart  
only -only trade with trend from this chart  
you get the trend from a stoch cross on this chart
2. Move to the 30min chart for enter & exit signs
  - a. enter
    - when the stoch crosses on the this chart
    - when you have a candle formation sign
    - ie. - big shaddow- tail or nose
    - engulfing candle-
    - inside candle -
    - 3 candle reversal
    - **you use the 50ema to make sure you have pip room**
    - ie. you want the 50ema under the price to sell  
over the price to buy
    - if the 50ema has a strong angle it may not be able to cross  
then you want the price to make a strong move back  
to the area of the 50 or better touch it .
  - b. exit
    - a cross on the 4 hour Stoch & you are out
    - more safe close-and the one I used this week
    - a cross on the 30min stoch -or a candle sign
    - reverse of enter sign - above

if you want to use multi-lots enter with 3 lots

close 1st lot with 10 pip win

2nd lot with 25 pip win

3rd lot exit sign

when you hit your 1st target move up your stop loss etc  
SL is 35

I used this on

Eur/ Usd & Usd/Jpn Usd/Chf  
Gbp/Usd Usd/Cna Aus/Usd  
the 1st 3 were easier to work with.

4 hour chart

cross of the stoch

- Red we are only looking to go down
- blue we are only looking to go up

30 min chart

the red & blue lines are from the 4 hour chart & show the trend

red arrows enter signs

3 signs

- a. big tail on a bear candle
- b. cross of the shoch on the 30 mins
- c. 3 candle reversal

blue arrow exit signs - you get them all here

- a. big tail on a bull candle - shoch cross- 3 candle reversal
