

earn to follow the 4 hour trend !!!!!!!

the easiest way to do that is a 4 channel on your chart & only go with it !!

you will win 85% of the time!!

esp. on the big 3 pairs E/U- E/J – G/U

70-80% of the time price bounces inside the channel

85% with trend 65% against the trend ,

& if you add other tools it can get up to 90-95%

I Only only go with the trend

2nd.

also learn to use the 200 ema on all time frames esp.

week,day,4 hours, -- then hour ,30 mins etc .

if price is up on the 1st 3 & down on say the 30 min

look to buy

- if the reverse it true look to sell.
