## **PART I INVESTMENT ENVIRONMENT**

<b>1</b>	<b>Bonds and Money-Market Instruments</b>	<b>3</b>
1.1	Bonds	3
1.1.1	General Characteristics of Bonds	3
1.1.2	Bonds by Issuers	17
1.2	Money-Market Instruments	25
1.2.1	Definition	25
1.2.2	The Role of the Central Bank	25
1.2.3	T-Bills	26
1.2.4	Certificates of Deposit	28
1.2.5	Bankers' Acceptances	29
1.2.6	Commercial Paper	29
1.2.7	Interbank Deposits	30
1.2.8	Repo and Reverse Repo Market Instruments	30
1.3	End of Chapter Summary	32
1.4	References and Further Reading	33
1.4.1	Books and Papers	33
1.4.2	Websites	33
1.5	Problems	34
1.5.1	Problems on Bonds	34
1.5.2	Problems on Money-Market Instruments	36
1.6	Appendix: Sector Breakdown of the Euro, the UK and the Japan Corporate Bond Markets	37
<b>2</b>	<b>Bond Prices and Yields</b>	<b>41</b>
2.1	Introduction to Bond Pricing	41
2.2	Present Value Formula	43

2.2.1	Time-Value of Money	43
2.2.2	The Mathematics of Discounting	43
2.2.3	Nominal versus Real Interest Rates	45
2.2.4	Time Basis and Compounding Frequency Conventions	46
2.2.5	Continuous Compounding	47
2.3	Taxonomy of Rates	49
2.3.1	Coupon Rate and Current Yield	49
2.3.2	Yield to Maturity	49
2.3.3	Spot Zero-Coupon (or Discount) Rate	51
2.3.4	Forward Rates	52
2.3.5	Bond Par Yield	54
2.4	End of Chapter Summary	54
2.5	References and Further Reading	54
2.6	Problems	55

## PART II

### TERM STRUCTURE OF INTEREST RATES

<b>3</b>	<b>Empirical Properties and Classical Theories of the Term Structure</b>	<b>63</b>
3.1	Definition and Properties of the Term Structure	63
3.1.1	What Kind of Shape Can It Take?	65
3.1.2	How Does It Evolve over Time?	68
3.2	Classical Theories of the Term Structure	81
3.2.1	The Pure Expectations Theory	82
3.2.2	The Pure Risk Premium Theory	83
3.2.3	The Market Segmentation Theory	85
3.2.4	The Biased Expectations Theory: An Integrated Approach	86
3.2.5	Illustration and Empirical Validation	86
3.2.6	Summary and Extensions	87
3.3	End of Chapter Summary	88
3.4	References and Further Reading	90
3.4.1	On the Empirical Behavior of the Yield Curve	90
3.4.2	On the Principal Component Analysis of the Yield Curve	90
3.4.3	On the Classical Theories of the Term Structure of Interest Rates	90
3.5	Problems	91
<b>4</b>	<b>Deriving the Zero-Coupon Yield Curve</b>	<b>96</b>
4.1	Deriving the Nondefault Treasury Zero-Coupon Yield Curve	96
4.1.1	How to Select a Basket of Bonds?	96
4.1.2	Direct Methods	97
4.1.3	Indirect Methods	103

4.2	Deriving the Interbank Zero-Coupon Rate Curve	130
4.2.1	How to Select the Basket of Instruments?	130
4.2.2	Interpolation Methods	132
4.2.3	Least Squares Methods Based on Rates	132
4.2.4	Least Squares Methods Based on Prices	133
4.3	Deriving Credit Spread Term Structures	136
4.3.1	Disjoint Methods	136
4.3.2	Joint Methods	137
4.4	End of Chapter Summary	142
4.5	References and Further Reading	144
4.6	Problems	146
4.7	Appendix: A Useful Modified Newton's Algorithm	155

### PART III

#### HEDGING INTEREST RATE RISK

<b>5</b>	<b>Hedging Interest-Rate Risk with Duration</b>	<b>163</b>
5.1	Basics of Interest-Rate Risk: Qualitative Insights	163
5.1.1	The Five Theorems of Bond Pricing	163
5.1.2	Reinvestment Risk	164
5.1.3	Capital Gain Risk	165
5.1.4	Qualifying Interest-Rate Risk	166
5.2	Hedging with Duration	167
5.2.1	Using a One-Order Taylor Expansion	167
5.2.2	Duration, $\$Duration$ and Modified Duration	170
5.2.3	How to Hedge in Practice?	173
5.3	End of Chapter Summary	175
5.4	References and Further Reading	176
5.4.1	Books	176
5.4.2	Papers	176
5.5	Problems	177
<b>6</b>	<b>Beyond Duration</b>	<b>182</b>
6.1	Relaxing the Assumption of a Small Shift	182
6.1.1	Using a Second-Order Taylor Expansion	182
6.1.2	Properties of Convexity	185
6.1.3	Hedging Method	187
6.2	Relaxing the Assumption of a Parallel Shift	188
6.2.1	A Common Principle	188
6.2.2	Regrouping Risk Factors through a Principal Component Analysis	192
6.2.3	Hedging Using a Three-Factor Model of the Yield Curve	195
6.3	End of Chapter Summary	199

6.4	References and Further Reading	200
6.5	Problems	201
<b>PART IV</b>		
<b>INVESTMENT STRATEGIES</b>		
<b>7</b>	<b>Passive Fixed-Income Portfolio Management</b>	<b>213</b>
7.1	Straightforward Replication	213
7.2	Replication by Stratified Sampling	214
7.3	Tracking-Error Minimization	216
	7.3.1 Optimization Procedure	216
	7.3.2 Bond Return Covariance Matrix Estimation	217
7.4	Factor-Based Replication	226
7.5	Derivatives-Based Replication	229
7.6	Pros and Cons of Stratified Sampling versus Tracking-Error Minimization	230
7.7	End of Chapter Summary	230
7.8	References and Further Reading	231
	7.8.1 Books and Papers	231
	7.8.2 Websites	231
7.9	Problems	231
<b>8</b>	<b>Active Fixed-Income Portfolio Management</b>	<b>233</b>
8.1	Market Timing: Trading on Interest-Rate Predictions	233
	8.1.1 Timing Bets on No Change in the Yield Curve or “Riding the Yield Curve”	234
	8.1.2 Timing Bets on Interest-Rate Level	236
	8.1.3 Timing Bets on Specific Changes in the Yield Curve	238
	8.1.4 Scenario Analysis	251
	8.1.5 Active Fixed-Income Style Allocation Decisions	255
8.2	Trading on Market Inefficiencies	268
	8.2.1 Trading within a Given Market: The Bond Relative Value Analysis	269
	8.2.2 Trading across Markets: Spread and Convergence Trades	276
8.3	End of Chapter Summary	282
8.4	References and Further Reading	283
	8.4.1 On Active Fixed-Income Strategies	283
	8.4.2 On Active Asset Allocation Decisions	284
8.5	Problems	286
<b>9</b>	<b>Performance Measurement on Fixed-Income Portfolios</b>	<b>293</b>
9.1	Return Measures	293
	9.1.1 Arithmetic Rate of Return	293
	9.1.2 Geometric Rate of Return	294

9.2	Risk-Adjusted Performance Evaluation	295
9.2.1	Absolute Risk-Adjusted Performance Evaluation	296
9.2.2	Relative Risk-Adjusted Performance Evaluation	299
9.3	Application of Style Analysis to Performance Evaluation of Bond Portfolio Managers: An Example	309
9.3.1	Alpha Analysis	310
9.3.2	Passive Versus Active Managers	313
9.4	End of Chapter Summary	314
9.5	References and Further Reading	315
9.5.1	Books and Papers	315
9.5.2	Websites	316
9.6	Problems	316

**PART V**  
**SWAPS AND FUTURES**

<b>10</b>	<b>Swaps</b>	<b>325</b>
10.1	Description of Swaps	325
10.1.1	Definition	325
10.1.2	Terminology and Conventions	325
10.2	Pricing and Market Quotes	326
10.2.1	Pricing of Swaps	326
10.2.2	Market Quotes	333
10.3	Uses of Swaps	334
10.3.1	Optimizing the Financial Conditions of a Debt	335
10.3.2	Converting the Financial Conditions of a Debt	336
10.3.3	Creating New Assets Using Swaps	337
10.3.4	Hedging Interest-Rate Risk Using Swaps	338
10.4	Nonplain Vanilla Swaps	341
10.4.1	Accrediting, Amortizing and Roller Coaster Swaps	341
10.4.2	Basis Swap	341
10.4.3	Constant Maturity Swap and Constant Maturity Treasury Swap	342
10.4.4	Forward-Starting Swap	342
10.4.5	Inflation-Linked Swap	342
10.4.6	Libor in Arrears Swap	343
10.4.7	Yield-Curve Swap	343
10.4.8	Zero-Coupon Swap	344
10.5	End of Chapter Summary	344
10.6	References and Further Reading	345
10.6.1	Books and Papers	345
10.6.2	Websites	346
10.7	Problems	346

<b>11</b>	<b>Forwards and Futures</b>	<b>352</b>
11.1	Definition	352
11.2	Terminology, Conventions and Market Quotes	353
11.2.1	Terminology and Conventions	353
11.2.2	Quotes	355
11.3	Margin Requirements and the Role of the Clearing House	357
11.4	Conversion Factor and the Cheapest-to-Deliver Bond	358
11.4.1	The Cheapest to Deliver on the Repartition Date	359
11.4.2	The Cheapest to Deliver before the Repartition Date	360
11.5	Pricing of Forwards and Futures	361
11.5.1	Forward-Spot Parity or How to Price a Forward Contract?	361
11.5.2	The Forward Contract Payoff	363
11.5.3	Relation between Forward and Futures Prices	364
11.6	Uses of Forwards and Futures	364
11.6.1	Pure Speculation with Leverage Effect	364
11.6.2	Fixing Today the Financial Conditions of a Loan or Investment in the Future	365
11.6.3	Detecting Riskless Arbitrage Opportunities Using Futures	366
11.6.4	Hedging Interest-Rate Risk Using Futures	367
11.7	End of Chapter Summary	369
11.8	References and Further Reading	370
11.8.1	Books and Papers	370
11.8.2	Websites of Futures Markets and of the Futures Industry Association	370
11.9	Problems	371
11.10	Appendix: Forward and Futures Prices Are Identical When Interest Rates Are Constant	374

## PART VI

### MODELING THE TERM STRUCTURE OF INTEREST RATES AND CREDIT SPREADS

<b>12</b>	<b>Modeling the Yield Curve Dynamics</b>	<b>381</b>
12.1	The Binomial Interest-Rate Tree Methodology	382
12.1.1	Building an Interest-Rate Tree	382
12.1.2	Calibrating an Interest-Rate Tree	384
12.2	Continuous-Time Models	387
12.2.1	Single-Factor Models	388
12.2.2	Multifactor Models	392
12.3	Arbitrage Models	396

12.3.1	A Discrete-Time Example: Ho and Lee's Binomial Lattice	396
12.3.2	Arbitrage Models in Continuous Time	401
12.4	End of Chapter Summary	406
12.5	References and Further Reading	407
12.6	Problems	411
12.7	Appendix 1: The Hull and White Trinomial Lattice	413
12.7.1	Discretizing the Short Rate	413
12.7.2	Calibrating the Lattice to the Current Spot Yield Curve	416
12.7.3	Option Pricing	419
12.8	Appendix 2: An Introduction to Stochastic Processes in Continuous Time	420
12.8.1	Brownian Motion	420
12.8.2	Stochastic Integral	423
12.8.3	Stochastic Differential Equations (SDE)	425
12.8.4	Asset Price Process	426
12.8.5	Representation of Brownian Martingales	426
12.8.6	Continuous-Time Asset Pricing	427
12.8.7	Feynman–Kac Formula	431
12.8.8	Application to Equilibrium Models of the Term Structure	432
<b>13</b>	<b>Modeling the Credit Spreads Dynamics</b>	<b>437</b>
13.1	Analyzing Credit Spreads	438
13.1.1	Ratings	438
13.1.2	Default Probability	440
13.1.3	The Severity of Default	441
13.2	Modeling Credit Spreads	441
13.2.1	Structural Models	442
13.2.2	Subsequent Models	446
13.2.3	Reduced-Form Models	448
13.2.4	Historical versus Risk-Adjusted Probability of Default	450
13.3	End of Chapter Summary	453
13.4	References and Further Reading	454
13.4.1	Books and Papers	454
13.4.2	Websites	455
13.5	Problems	455
<b>PART VII</b>		
<b>PLAIN VANILLA OPTIONS AND MORE EXOTIC DERIVATIVES</b>		
<b>14</b>	<b>Bonds with Embedded Options and Options on Bonds</b>	<b>461</b>
14.1	Callable and Puttable Bonds	461

---

14.1.1	Institutional Aspects	461
14.1.2	Pricing	462
14.1.3	OAS Analysis	469
14.1.4	Effective Duration and Convexity	470
14.2	Convertible Bonds	472
14.2.1	Institutional Aspects	472
14.2.2	Valuation of Convertible Bonds	475
14.2.3	Convertible Arbitrage	481
14.3	Options on Bonds	484
14.3.1	Definition	484
14.3.2	Uses	485
14.3.3	Pricing	489
14.4	End of Chapter Summary	493
14.5	References and Further Reading	494
14.5.1	On Callable and Puttable Bonds	494
14.5.2	On Convertible Bonds	494
14.5.3	On Options on Bonds	495
14.6	Problems	496
14.7	Appendix: Bond Option Prices in the Hull and White (1990) Model	500
14.7.1	Call on Zero-Coupon Bond	501
14.7.2	Call on Coupon Bond	501
<b>15</b>	<b>Options on Futures, Caps, Floors and Swaptions</b>	<b>502</b>
15.1	Options on Futures	502
15.1.1	Definition and Terminology	502
15.1.2	Pricing and Hedging Options on Futures	504
15.1.3	Market Quotes	507
15.1.4	Uses of Futures Options	510
15.2	Caps, Floors and Collars	510
15.2.1	Definition and Terminology	510
15.2.2	Pricing and Hedging Caps, Floors and Collars	512
15.2.3	Market Quotes	516
15.2.4	Uses of Caps, Floors and Collars	517
15.3	Swaptions	522
15.3.1	Definition and Terminology	522
15.3.2	Pricing and Hedging Swaptions	523
15.3.3	Market Quotes	528
15.3.4	Uses of Swaptions	528
15.4	End of Chapter Summary	529
15.5	References and Further Reading	530
15.5.1	Books and Papers	530
15.5.2	Websites	531
15.6	Problems	531

---

15.7	Appendix 1: Proof of the Cap and Floor Formulas in the Black (1976) Model	536
15.8	Appendix 2: Proof of the Swaption Formula in the Black (1976) Model	537
15.9	Appendix 3: Forward and Futures Option Prices Written on T-Bond and Libor in the Hull and White (1990) Model	538
15.9.1	Options on Forward Contracts	538
15.9.2	Options on Futures Contracts	539
15.10	Appendix 4: Cap, Floor and Swaption Prices in the Hull and White (1990) Model	541
15.10.1	Cap and Floor	541
15.10.2	Swaption	542
15.11	Appendix 5: Market Models (BGM/Jamshidian Approach)	543
15.11.1	Why Define New Variables?	543
15.11.2	Building New Variables	544
15.11.3	The Dynamics of $L(t, \theta)$ and $K(t, t + \theta)$	546
15.11.4	Pricing of Caps	547
15.11.5	Calibration of the Model	548
<b>16</b>	<b>Exotic Options and Credit Derivatives</b>	<b>550</b>
16.1	Interest-Rate Exotic Options	550
16.1.1	Barrier Caps and Floors	550
16.1.2	Bounded Caps, Floors, Barrier Caps and Floors	552
16.1.3	Cancelable Swaps	553
16.1.4	Captions and Floortions	553
16.1.5	Choosercaps and Flexicaps-and-Floors	553
16.1.6	Contingent Premium Caps and Floors	555
16.1.7	Extendible Swaps	556
16.1.8	Incremental Fixed Swaps	556
16.1.9	Index Amortizing Bonds and Swaps	557
16.1.10	Marked-to-Market Caps	559
16.1.11	Moving Average Caps and Floors	559
16.1.12	N-Caps and Floors	560
16.1.13	Q-Caps and Floors	560
16.1.14	Range Accrual Swap	561
16.1.15	Ratchet Caps and Floors	562
16.1.16	Reflex Caps and Floors	563
16.1.17	Rental Caps and Floors	564
16.1.18	Rolling Caps and Floors	564
16.1.19	Spread Options	565
16.1.20	Subsidized Swaps	565
16.1.21	Pricing and Hedging Interest-Rate Exotic Options	567

---

16.2	Credit Derivatives	567
16.2.1	The Significance of Credit Derivatives	567
16.2.2	Types of Credit Derivatives	569
16.3	End of Chapter Summary	577
16.4	References and Further Reading	577
16.4.1	On Interest-Rate Exotic Options	577
16.4.2	On Credit Derivatives	578
16.4.3	On Numerical Methods (See the Appendix 2)	578
16.4.4	Websites	579
16.5	Problems	579
16.6	Appendix 1: Pricing and Hedging Barrier Caps and Floors in the Black Model	582
16.6.1	Barrier Cap Formulas	582
16.6.2	Barrier Floor Formulas	583
16.6.3	Barrier Cap and Floor Greeks	583
16.7	Appendix 2: Numerical Methods	585
16.7.1	Monte Carlo Simulations	585
16.7.2	Finite-Difference Methods	587

## PART VIII SECURITIZATION

<b>17</b>	<b>Mortgage-Backed Securities</b>	<b>595</b>
17.1	Description of MBSs	595
17.1.1	Definition	595
17.1.2	The Amortization Mechanism	595
17.1.3	The Prepayment Feature	598
17.1.4	Typology of MBS	598
17.2	Market Quotes and Pricing	600
17.2.1	Market Quotes	601
17.2.2	Pricing of MBS	602
17.3	End of Chapter Summary	605
17.4	References and Further Reading	606
17.4.1	Books and Papers	606
17.4.2	Websites	607
17.5	Problems	607
<b>18</b>	<b>Asset-Backed Securities</b>	<b>609</b>
18.1	Description of ABSs	609
18.1.1	Definition	609
18.1.2	Credit Enhancement	609

---

18.2	Market Quotes and Pricing	612
18.3	CAT Bonds and CAT Derivatives	614
18.4	End of Chapter Summary	617
18.5	References and Further Reading	617
18.6	Problems	618
<b>Index</b>		<b>619</b>
