

Chart is 60 mins Eur/Usd  
(I traded it on 30 min,4 hour, day )

Stoch: setting 5.3.3 Low/High  
green lines on Stoch -from top to bottom are 80%, 50%, 20%

blue area is good to buy  
red area is good to sell  
yellow is the are of concern  
from the point the two stoch lines cross each other  
to the point they come out of the "80% or 20% zone"  
we really don't know what is going on with the stoch  
best to stay out  
.. other wise it is fine to trade anyother time with them
